

POLE BAND SYSTEM

WARNING

Cancer and Reproductive Harm: www.p65warnings.ca.gov

KEY FEATURES

- ✓ Aluminum hardware is high strength and high resistance to corrosion
- ✓ Mounting plates with 2" or 3" carriage bolt
- ✓ 3/4" or 1-1/4" Stainless Steel Pre-Cut Banding
- ✓ Rolls of banding available for field cuts to length

The Slingco Pole Band System includes bolt clamps and mounting plates and 3/4" or 1-1/4" banding. Packages with different band lengths make this system flexible for varying pole sizes.

Measure the circumference of the pole and add a minimum of 6" and select the next size up. Securely mount hardware to cylindrical or square wooden, metal or concrete poles.

The system includes aluminum hardware extrusions, bolt hardware and pre-cut lengths of stainless steel banding. The system is easy to attach and tighten onto poles. A banding tool like the Slingco CPC8748 or CPC8780 may be used to tighten straps. The optional mounting plates allow quick attachment of hardware.

Extrusions and mounting plates available separately for use with rolls of banding cut to length in the field.

POLE BAND SYSTEM

If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
