

HYDRAULIC CRIMPER

WARNING

Cancer and Reproductive Harm: www.p65warnings.ca.gov

KEY FEATURES

- ✓ Accepts Slingco, Burndy L and Alcoa 6000 Series dies
- ✓ Steel Carrying Case
- ✓ Includes Ground Stand
- ✓ Lifting eye for hoist work
- ✓ For Crimping ACSR and ACAR transmission and distribution cables

Slingco's Hydraulic Crimping Tools are designed to crimp sleeves and lugs on ACSR and ACAR transmission & distribution cables using dies that meet the standards of the utility industry. Our crimping tools are ideal for use in constructing substations and transmission lines.

The Single-Acting Crimping Tool uses hydraulic pressure to advance the ram into position, and an internal spring to return the ram to the original position. The Double-Acting Crimping Tool advances and returns the ram using hydraulic pressure alone, eliminating the possibility of the ram sticking or becoming jammed.

Our Hydraulic Crimping Tools come in a steel carrying case, and are lightweight and portable. Our crimping tools accept Slingco S60 Dies, or any shell-type dies used with Alcoa or Burndy 60-tonne or 100-tonne crimping tools.

Slingco Part No.	Tool Type	Crimp Force (Tons)	Operating Pressure	Tool Weight (lb)	Oil Required (cc)
TCR7003	Single Action	60	10,000 psi (700 bar)	47	308
TCR7018	Double Action	60	10,000 psi (700 bar)	51	314
TCR08490	Single Action	100	10,000 psi (700 bar)	78	422

Dimensions

The figures shown are indicative only. Fully dimensioned data-sheets are available on request. Nominal figures/actuals are as per data-sheet with tolerances of +/-10%. Please contact us if you have any questions.

Range dimension overlaps

If the cable, rope or hose you have lies where ranges overlap, e.g. 1" when sizing is 0.5-1.00 and 1.00-1.5 we recommend that you select your cable grip to achieve break load first. If tensile strengths are equal or both adequate, choose the smaller of the two. Please contact us if you have any questions.
